# Design Principles - Why?

**"Fundamentally, design principles are important because they help your team make decisions. Design principles should be foundational; set them up first, before you start designing."**

## **They can:**

- Educate and create alignment
- Fuel creativity
- Make better decisions, faster
- Improve your onboarding of new team members

## **At CB, they can also:**

- Guide design decisions
- Provide support for Design Systems
- Help with goals and KPIs
